YOU CAN COUNT ON PRESTON HIRE

We work incredibly hard at Preston Hire to forge a niche in the market to offer specialised hire solutions for a range of construction needs. From high-rise construction, to mining, government infrastructure and commercial jobs; our core products and services allow us to work closely with our customers to ensure the best equipment is available to them.

We proudly service customers Australia wide whilst also having branches in New Zealand, North America and Canada.

Our staff are experienced in their field and are focused on our customers whilst upholding the values of the Preston Hire brand. In today's challenging business environment we cannot rest on past performance. Our customers are under pressure and constantly looking for more efficient ways to conduct their business. We are here to help.

I'm proud of my team and the way they continually evolve to keep finding new ways and new products. We are committed to delighting our current customers whilst also enticing new customers to enjoy the benefits our products, services and solutions can provide.

Preston Hire will continue to invest in quality, specialised equipment. Our SuperCrane fleet continues to expand whilst remaining focused on providing unique equipment that is powerful, precise and delivers maximum performance. Talk to our committed team and you will quickly discover that our SuperCrane fleet has a Crane Solution for every application.

We look forward to working with you!"

OUR SUPERCRANE FLEET

The construction sector and the crane hire market continues to demand specialised cranes. Projects are becoming increasingly involved which increases the number of challenges customers face and the need for specialised equipment to provide solutions. Today's projects require cranes with smaller footprints yet with the expectation for the same loads to be lifted. Customers are looking for larger capacities from smaller cranes to manage their lifting plans. Preston Hire is embracing these challenges by continuing to invest in the right cranes which will play integral roles in construction solutions for the future.

The SuperCrane fleet is made up of Kato, Maeda, UNIC, SANY, Liebherr and Sennebogen machines in various models and capacities. Each machine has been carefully selected based on its unique abilities, quality craftsmanship and the benefits it can provide to a broad range of disciplines. Our fleet includes Mini Cranes, Hydraulic Crawler Cranes and Mobile Cranes, including models that feature the latest eco-friendly, electric and battery technologies.

Frequent interaction with our customers to understand their current and future projects enables Preston Hire to provide the right solution for every application. By customising our fleet to provide high levels of customer satisfaction ensures we will honour our promise of COUNT ON US.

OUR SERVICES

Beyond our equipment, Preston Hire provides additional services to customers to extend our offering including detailed lift studies, lift engineering, lift plans and crane attachments. Offering these services to customers demonstrates the importance of these additional resources from both a customer service and importantly a safety point of view.

Services provided by Preston Hire relevant to our SuperCrane fleet include:

- Various attachments including an extensive range of Glass-Lifting Rigs to service more sectors.
- Lift Studies
- Lift Plans
- Access to software programs including Maeda and Unic OEM outrigger reaction programs, Cranimax, Liccon Lift Planner, SANY crane customer software and Autocad
- Wet and Dry Hire

FLEET MANAGEMENT SYSTEM

Preston Hire has partnered with Teletrac Navman across our SuperCrane fleet, specifically using their Construction Asset Utilisation system. Telematics provides insightful data and allows us to share information with our customers that provide learnings, improvements and allow all of us to plan more effectively.

Our partnership with Teletrac Navman started in 2008 following a highly successful trial of in-vehicle unit installations. The software was quickly installed across the entire SuperCrane fleet allowing crane tracking abilities including movement and on-site activity. The technology provides access to a range of data, such as work hours and the condition of internals enabling the team to stay on top of maintenance, safety and continued delivery of great customer service.

FLEET CAPABILITY

MINI CRAWLER CRANES

Capacity	Make/Model	Quantity

SAFETY & QUALITY FIRST

Preston Hire places Safety and Quality Management at the core of our business. This is vital for the wellbeing of both our own staff and our customers. Our mission is to provide the best in current technology and offer products adhering to the highest possible quality and safety standards. We do not accept anything less.

WHS

Our Safety Management System has been AS4801 compliant since 2009 and has continued to be maintained as our business has grown. We always strive for best practice and take this accreditation very seriously. Working with builders of all sizes across Australia, we constantly meet and exceed their comprehensive safety requirements providing required documentation and evidence during the tender process to demonstrate the value we can provide.

Delivering a culture of Quality and Safety across our business is a major priority and we engage our employees by ensuring information is constantly transferred to them through daily pre-start meetings and monthly tool box talks. Our safe working culture not only ensures their own safety, but that of our customers and the public too; making us a supplier of choice within our industry.

Quality

Preston Hire is proud to be ISO 9001 Quality Certified!

This means our organisation is recognised as meeting international standards for quality management systems and are committed to delivering world-class processes. For our customers, this means they can rest assured knowing critical processes, documentation and systems relating to their hire will be of the highest standard.

Benefits of working with a business who value safety and quality include:

- All personnel have confidence they are in safe hands and their wellbeing is a priority.
- Consistent, repeatable processes with a common understood system.
- Dealing with staff who are confident in what to do and how it is to be done.
- Time savings for you thanks to efficient processes and systems.
- A committed business continually improving and enhancing their offering to meet new standards.

“Supporting the fleet with second to none service and having a thorough maintenance program is a key strategy for the business. The relationship we share with our servicing partner enables us to have our cranes fully serviced and operational and ready for the next project. Maintaining our fleet to the highest standards is a constant process and one we are committed to for the benefit of our customers.”

“We have strong relationships with all crane manufacturers, particularly the mini crawler crane manufacturers. We also work extremely closely with their Australian distributors and representatives. We continue to upgrade and update our fleet with the latest models and technology.”

Nothing we can't reach.
